Mr. John Castellana, FAIA  
Chair, 2014 Jury of Fellows  
The American Institute of Architects  
1735 New York Avenue, NW  
Washington, DC 20006

RE: Nomination of Thomas Jerry Lominack for Fellowship

Dear Mr. Castellana:

It is an honor for me serve as T. Jerry Lominack’s sponsor for nomination to the College of Fellows. I have known Jerry for over thirty-six years, first as his employee, and then as colleague and friend. His profound influence on his community, profession and decades of young architects make him a very deserving candidate.

Jerry welcomed me into his firm in 1978 when I chose Savannah for its renowned historic planning and architecture. He has continually been hailed as a leader in contemporary architecture within a historic context. Jerry’s gift for teaching those of us that have passed through his firm has created several generations of architects confident to successfully create the new amidst the old.

The architectural treasure that is Savannah requires a committed and active community to serve and advocate for the best balance between preservation and development. When I first came to Savannah, Jerry was a member of the critically important Historic District Board of Review. Decades later he can still be found in the same service and still advocating for the best design quality possible. His long time leadership in both the community and AIA venues is testament to his passion.

Jerry’s enthusiasm for sharing his knowledge and experience has always been evident to his colleagues and firm members. When the Savannah College of Art and Design was established in 1978, scores of architecture students began to discover the uniqueness of Savannah. Jerry has been a longtime advisor, visiting critic, and guest lecturer at SCAD, extending his reach and influence on future architects from the world over.

When you combine the largest historic district in the country with one of the most interesting architecture programs at SCAD, good things happen. Jerry Lominack has long championed the best union of preservation and contemporary design. The canvas that includes the community, college, and practice of architecture here in Savannah is a broad one. Jerry Lominack leads practicing architects, aspiring students, and committed citizens in a focused campaign for excellence.

That is why he was my first and only choice for employment after graduating. That is why I am pleased and honored to sponsor his nomination. Fellowship is more about future service than past recognition. Jerry's lifelong commitment will continue, no doubt. This deserved recognition will add a bit more strength to an important voice and I highly endorse his worthiness for the nomination.

Sincerely,

Forrest R. Lott, FAIA
SECTION 1: SUMMARY OF ACHIEVEMENTS

SUMMARY STATEMENT

Modern Design
In one of the country’s most historic cities, Jerry Lominack has been a voice – often the lone voice – campaigning for good late 20th and early 21st century architecture in Savannah’s Landmark- and other Historic Districts, while stressing the importance of protecting its rich stock of historic buildings. More than a voice, his practice has gracefully balanced the preservation of numerous historic buildings through quality rehabilitation and innovative adaptation, while also designing many of the most notable new, modern buildings in Savannah.

Jerry’s modernist designs in historic districts have been highlighted in the National Council of Architectural Registration Board’s Professional Development Program Monograph, “Sustainable Design II” and the National Park Service’s text The Georgia Catalog. Further, his design of Savannah’s most prominent public space, Ellis Square, was internationally recognized by the Congress for the New Urbanism as part of their 2013 Charter Awards. Described by an architectural historian as portraying “a modernist aesthetic in dialogue with traditional building forms,” Jerry’s lifetime of work has been a cornerstone of Savannah’s growth, a historic city on the national stage.

Historic Preservation
Jerry sees the value of historic buildings, often when others cannot, respecting the historic and architectural integrity of buildings through attention to accuracy when performing renovations. When Jerry began rehabilitating the ca. 1881 Robert T. Spencer House in Savannah’s Victorian District, the building was leaning on an adjacent structure after suffering a damaging fire and extensive moisture infiltration. Jerry took great care to design the house’s rehabilitation including a distinct - yet compatible - addition. Similarly, when Jerry was approached to rehabilitate Savannah’s largest remaining iron works complex, he insisted the historic metal Machine Shop building be addressed first to save it from collapse. Considered by many an eyesore, the building is the only one of its kind in Savannah’s National Historic Landmark District.

While serving on Savannah’s Historic District Board of Review, Jerry helped promote progressive ideals, such as innovative and green design and the creation of 21st century landmarks; becoming known and respected for his outspokenness. Jerry’s values pair a strong belief in historic preservation with an understanding that good architecture in any time and place builds on our heritage.

Community Involvement
Jerry lives his convictions, sharing his expertise to aid others through intensive community involvement. Serving on numerous committees related to urban design, architectural programs at universities, neighborhood groups, and the AIA, Jerry continually volunteers his time and knowledge. It is not unusual to find a letter to the editor by Jerry encouraging the community to consider design alternatives, demand better governance, and question information presented in the media. Likewise, Jerry’s designs are continually referenced when the future of Savannah’s historic districts is considered, whether it is regarding infill or new growth.

Under Jerry’s leadership as President of the state and local chapters of the AIA, he championed the movement of the AIA Georgia office into the historic building it occupied for several years, receiving the Bronze Medal for his efforts, and against great odds, steered AIA Savannah out of a period of financial neglect by recruiting numerous allied members and sponsorships which resulted in participation rates that have not been equaled.

Mentorship
A mainstay of Jerry’s career has been his involvement with multiple generations of design students. Every year, Jerry serves on numerous design reviews and several graduate thesis committees at the Savannah College of Art and Design (SCAD), guiding students to create designs that represent our time, complement their surroundings, and respect their context. With students representing over 100 countries, Jerry’s mentorship at SCAD has influenced students that have gone on practice architecture across the globe. This diverse array of students has benefited from Jerry’s expertise while, likewise, Jerry has benefited from their varied perspectives and enthusiasm.

Jerry’s talent for nurturing the next generation of architects has translated into an office environment that has produced many successful designers. Jerry passes his passion for sensitive and innovative design on to his employees, many of whom have gone on to become his respected competitors. Jerry’s legacy cannot be seen only in his designs on the ground but within the projects and lives of the designers he has influenced.
SECTION 2: ACCOMPLISHMENTS

2.1 SIGNIFICANT WORK

Jerry Lominack was the Principal Architect and Principal-in-Charge for all of the projects listed below, unless otherwise noted. Projects noted with an asterisk (*) are highlighted within an exhibit.

**KEHOE FOUNDRY BUILDING** *

(Critical Workforce Shelter Project), 2014

“I was particularly pleased by the comments of Jerry Lominack... He spoke up against yet another proposal for more boring brick boxes, making a plea for better contextual architecture. Rather than stripping architecture down to minimize costs and maximize profits, architects need to honor the city’s historical context... Architects today need to be reminded that they are creating the landmarks of the future.”

**2.2 HONORS AND AWARDS**

**AIA GEORGIA**

**2008 BERNARD B. ROTHSCHILD AWARD**

AIA Georgia’s highest honor is given in recognition of the most distinguished service to the profession of architecture exhibited by an architect who exemplifies the principles of the profession. The award was bestowed upon Jerry for his nearly four decades of advancement of design and design discourse through diligent pursuit of responsible architecture of the highest caliber. His involvement has contributed time and expertise to the betterment of the community and his professional commitment carries through in his encouragement of younger architects to get involved in community and professional organizations.

**2007 FIRM AWARD**

The second Firm Award to be given by AIA Georgia, Lominack Kolman Smith Architects was recognized for their commitment to architecture, the profession, the AIA, and the community. They were honored for demonstrating a culture of professional excellence evidenced in numerous design and community awards, consistent civic involvement, and an office that is a nurturing environment for interns.

**2007 CERTIFICATE OF SERVICE**

For chairing and leading the AIA Georgia Design and Honors Awards Task Force composed of architects and community leaders. Under Jerry’s direction, the Task Force successfully and creatively established the new criteria for AIA Georgia’s Design and Honor Awards, giving greater recognition to the team required to produce a successful project.

**2005 CERTIFICATE OF SERVICE**

For dedication to AIA Georgia for three years as President-Elect, President, and Past President and for the giving of time and energy to making the association a better steward of membership and the state of Georgia.

**2004 BRONZE MEDAL**

For distinguished service to the profession of architecture as the 2004 President of AIA Georgia, “with calm positive directives, Jerry helped guide AIA Georgia through an active year of office relocation, long range plan continuance and extended outreach programs.”

**2003 CERTIFICATE OF APPRECIATION**

For service to the profession and AIA Georgia as demonstrated through energy, leadership, and commitment as the 2003 President-Elect and as Chair of the Facilities Task Force.
2.2 SECTION 2: ACCOMPLISHMENTS

HONORS AND AWARDS

AIA SAVANNAH

2013 KOLMAN AWARD
AIA Savannah’s highest honor, having previously been awarded only twice since Ronald Kolman’s inaugural award in 1998, it was awarded to Jerry “in recognition of his service to the community and his high ethical standards in the practice of architecture.”

2008 CERTIFICATE OF APPRECIATION FOR SERVICE TO THE PROFESSION
For commitment to excellence in providing “outstanding educational opportunities” while serving as Education Director.

2004 CERTIFICATE OF APPRECIATION FOR SERVICE TO THE PROFESSION
For leadership as President of AIA Georgia in 2004.

2002 CERTIFICATE OF APPRECIATION FOR SERVICE TO THE CHAPTER
For excellent leadership as the 2002 President of AIA Savannah.

2001 CERTIFICATE OF APPRECIATION
For “outstanding leadership” in hosting “Build to Last Architecture,” the 2001 South Atlantic Region AIA Conference.

2000 CHAPTER AWARD OF EXCELLENCE
For “an exceptional year of chapter educational programs.”

MISCELLANEOUS

2013 SAVANNAH DEVELOPMENT AND RENEWAL AUTHORITY (SDRA)
In recognition of hard work, support, and a commitment of excellence to the SDRA from 2005 to 2013.

2009 SERVICE AWARD, ASSOCIATION OF COLLEGIATE SCHOOLS OF ARCHITECTURE
For recognition of Jerry’s contributions to architectural education and the Association.

2008 PRESERVATION AWARD, HISTORIC SAVANNAH FOUNDATION
Nominated by the Executive Director, Jerry was given this award for outstanding personal accomplishment in preservation and protection of Savannah’s heritage.

2008 SAVANNAH DEVELOPMENT AND RENEWAL AUTHORITY (SDRA)
For exemplary service as Planning and Plan Implementation Chair of the SDRA.

2007 U.S. GREEN BUILDING COUNCIL, SAVANNAH CHAPTER
For service on the Executive Committee.

1989 CERTIFICATE OF APPRECIATION, SAVANNAH ARTS COMMISSION

1985 AWARD, SAVANNAH ARTS COMMISSION
In appreciation of service as Chair in 1984 and 1985.

FELLOWSHIP NOMINATION | Thomas Jerry Lominack, AIA | 11

**PATIE’S HALLMARK SHOPPE — SAVANNAH HISTORIC LANDMARK DISTRICT**
1995 Historic Preservation Award (Historic Rehabilitation)
Jerry Lominack was the first professional to join the proposal for the 2012 NCARB Award, a ground-breaking venture that [Savannah College of Art and Design] SCAD was awarded to create an interactive game of professional practice. Over a period of a year, Mr. Lominack worked tirelessly with the students as an Architect-Advisor and was pivotal in helping achieve this 21st Century educational advancement that will dramatically change the way future architects are prepared for the profession."

CAROLE E. PACHECO, AIA, NCARB
PROFESSOR OF ARCHITECTURE, SCAD
JULY 8, 2014

Jerry Lominack is mentioned or quoted in all the articles listed below related to his involvement in the community.

**“SAVANNAH ARCHITECTURAL TOURS”**

“On the east side of the street is a 1970s house designed by Jerry Lominack. Although designed in a style of its time, notice the raised stoop similar to its neighbors and the similar scale being employed. Even the fenestration and materials are relatively comparable to the rest of the block...Most nineteenth century Savannah houses come up to the sidewalk with a flat wall and perhaps a bay window pushing out slightly. In this case, the street wall is achieved with a section of garden wall and architectural landscaping.”

Jerry was not only the designer but him and his wife, the clients result is a house that has served as a reference point for modern design in Savannah for decades

HARMONY & INNOVATION

“The Lominack House accentuates mass as well as space, and exploits plastic as well as rectilinear forms. It blends and contrasts pleasantly with the architecture of old Savannah. Both [the Lominack and Mooney] houses are designed with a freedom and exuberance not always associated with the style, but their dramatic silhouettes, the interplay of space and mass, the plain wall surfaces, and the avoidance of applied ornament affirm its influence.”

JOHN LINLEY, “THE GEORGIA CATALOG: HISTORIC AMERICAN BUILDINGS SURVEY” NATIONAL PARK SERVICE, 1988

THROUGH THE YEARS: A CATALYST FOR DISCUSSION

“Does such a lack of understanding explain similar protests 25 years ago when Jerry Lominack’s modern plan for a Savannah townhouse was built? Is there another example of fine 20th-century building in this city? And does this incomprehension of modern style allow for indifference to poor architecture “within the guidelines” to be built on an ongoing basis?”

ARTIST JOAN COBITZ, [ON MODERN BUILDINGS IN SAVANNAH] SAINTAVANNAH MORNING NEWS OCTOBER 12, 1999

REMAINS INFLUENTIAL

“Three actions indicate that contemporary buildings may be finding a wider acceptance among the 19th century gems for which Savannah is famous. Board members approved a...daring new contemporary home... found visually compatible to the 19th century row houses on one side and the 1970s-era home built by architect Jerry Lominack across the street—the only truly contemporary home downtown.”

the client’s goal was to relocate within the historic district by redeveloping a neglected lot through the construction of a contemporary house similar to Jerry’s body of modern work in Savannah

the result is a house that respects the harmony and rhythm of the historic district but also embraces modern design elements, receiving unanimous approval from the Historic District Review Board with initial submission

“Those who fear that downtown Savannah will one day be dominated by cookie-cutter, faux historic buildings might want to head down to Washington Square”

BILL DAWERS, SAVANNAH MORNING NEWS, JUNE 2, 2014

PHOTOS BY NOMINEE

DECLARATION OF RESPONSIBILITY

I have personal knowledge of the nominee’s responsibility for the project listed above. That responsibility included:

Largely responsible for design, Project direction under nominee, and Nominee’s firm executed the project

Anne K. Smith, AIA, Principal, Lominack Kolman Smith Architects (Partner)
Ellis Square

**Project**
architecture, urban design

**Firm of Record**
Lominack Kolman Smith Architects

**Date Completed**
2010

**Role of Nominee**
principal architect

**Location**
Savannah National Historic Landmark District

"This project will go down as one of the best in the history of this city"

**Synopsis**

With origins in General Oglethorpe’s plan for Savannah, Ellis Square is a location as old as the city itself. Home of Savannah’s beloved City Market for decades, the landmark was demolished in 1954 to make way for a parking garage, removing the square entirely. Now, after more than 50 years dormant, the square lives again.

**Embracing a circular design unique in Savannah, Ellis Square features a plaza and green space, providing a flexibility that no other Savannah square can provide.** The sunken elliptical lawn creates a safe space while providing seating at the perimeter. An interactive fountain is centrally located and provides a refreshing escape for children and a colorful light display. At the northwest corner is a hospitality and information center, storage, and restrooms that are capped with a green roof. Within the information center is a stair and elevator connecting visitors to a four-story parking deck below.

The result of numerous public charrettes and share-holder meetings and collaboration between planners, architects, and landscape architects, Ellis Square has become a catalyst for development and a destination in Savannah’s National Historic Landmark District.
PUBLIC ENGAGEMENT

“First, it is important to understand the sensitivity of any kind of design work in Savannah’s Landmark Historic District, both in meeting stringent guidelines and in engaging a highly motivated public and business community. [Lominack Kolman Smith] LKS has excelled in this very challenging environment.

LKS, as the local member of the design team, was charged with developing plans for restoration of this square. It required sensitivity of Savannah’s past and an understanding of 21st century design that fosters activity in a public space. A major component of this challenging project was an unprecedented amount of public engagement and input. The LKS staff successfully developed an innovative design that was strongly endorsed by the City Council and a diverse citizenry.”

CHRISTOPHER MORRILL,  
CITY MANAGER, CITY OF ROANOKE, VA  
(EXFORMER SAVANNAH ASSISTANT CITY MANAGER)

INTERNATIONAL RECOGNITION

“The project’s key contribution was to provide a basis for a long-term revival and evolution of this historic urban neighborhood. Rather than dictate a large-scale repurposing through a single developer, the plan builds from the thesis of Savannah’s original visionary plan...

The lasting influence of Savannah’s 1733 City Plan demonstrates the value that can be created through long-term planning and investment. The Ellis Square redevelopment similarly seeks to not only replace an eyesore for current residents, but also spark a process of reinvestment and restoration that will enhance Savannah for many years to come.”

**role of nominee**
principal architect

**location**
Savannah National Historic Landmark District

**synopsis**
Named after the frogs that would congregate in the area after a hard rain, the Frogtown neighborhood dates back to Savannah’s colonial era. The Frogtown Lofts, however, are anything but colonial. Incorporating a structure formerly used as a railroad switching station dating to the 1940s, this modern design transformed an underdeveloped and underserved area of downtown and has won great praise as a modern and distinct, yet harmonious, building within Savannah’s National Landmark Historic District. Jerry and his team developed the building program with the area’s growing young professional and college community in mind. At the heart of their efforts was the need to provide thoughtfully designed, below market cost housing within the downtown area. The project received unanimous approval from Savannah’s Historic District Board of Review.

**AWARDS**
- 2010 AIA GEORGIA FOR MERIT
- 2009 AIA SAVANNAH FOR EXCELLENCE
- 2008 HISTORIC SAVANNAH FOUNDATION
INTEGRATING THE NEW & OLD

“The design of Frogtown Lofts integrates its historic setting with the needs of 21st century living. The large expanses of glass, solid concrete construction, and industrial character take inspiration from the Bauhaus-influenced historic switchboard building on the site. The new construction buildings portray a modern interpretation of the traditional Savannah row-house pattern.”

2010 AIA AWARD, THE GEORGIA ARCHITECT, SEPTEMBER 2010

- Structural insulated concrete panel system, cast locally in Savannah
- Layer of rigid insulation sandwiched between two layers of high-density concrete
- Energy-efficient aluminum storefront windows
- Precast hollow core concrete floor and ceilings
- Green roof with an R-value of 30
- High-efficiency heat pumps
- Pervious surfaces and drought-resistant plant materials

DEPARTMENT OF RESPONSIBILITY

I have personal knowledge of the nominee’s responsibility for the project listed above. That responsibility included:

Largely responsible for design, Project direction under nominee, and Nominee’s firm executed the project
**SECTION 3: EXHIBITS**

**dunlevie house**

- **Project**: historic restoration
- **Firm of Record**: Lominack Kolman Smith Architects
- **Date Completed**: 2009
- **Role of Nominee**: principal architect
- **Location**: Allenhurst, GA

**Synopsis**

This project included the complete restoration of a 1920s historic homestead on a rural land conservation site. Jerry designed the renovation and a modern addition as well as managed the project. With few historic photographs, the building was studied extensively to reveal changed and missing details that needed to be restored.

New construction included electrical and HVAC systems, an updated plumbing system, and a new septic field. A modern, yet complementary design enclosed the original breezeway, which is now the catering kitchen. The building was rehabilitated for public use and is now an educational and nature center.

**AWARDS**

- 2009 AIA SAVANNAH CITATION
- 2010 MARGUERITE WILLIAMS AWARD & 2010 EXCELLENCE IN PRESERVATION AWARD, GEORGIA TRUST FOR HISTORIC PRESERVATION

"... you have provided an invaluable service in helping to ensure that the house will be able to serve the community for many years to come."

 JOE ROTHWELL, RESTORATION PROJECT MANAGER
 MILLER PASTURE, GEORGIA LAND TRUST, INC.
Located on a rural land conservation site known as Miller Pasture, the house is the historic homestead property of the Dunlevie family, owners of the Dunlevie Lumber Company. Today, the land is owned by the D.C. Miller Trust and operated by the Georgia Land Trust.

Previously, the front wrap-around porch had been altered, the tall slender columns modified, and the stairs replaced with brick. **As part of restoration efforts, the columns were restored by sistering the new bottom portions to the original upper shafts, bases, and capitals.** The balustrade and stairs were restored to match a historic photograph, while meeting current code requirements. A sleeping porch added in the recent past on the second story was removed, restoring the original proportions of the building. Further, the first floor screened porch was restored, opening the breezeway to the summer kitchen, and the heart pine floors were refinished. Lastly, the historic paint colors were discovered and matched throughout the property.

**DECLARATION OF RESPONSIBILITY**

- historic rehabilitation—commercial and residential
- & new construction—residential lofts

**firm of record**
Lominack Kolman Smith Architects

**date completed**
2010

**role of nominee**
principal architect

**location**
Thomas Square Streetcar Historic District,

**synopsis**
The Starland Design District presented a unique opportunity for historic preservation paired with new and innovative design. Named for the site’s historical significance as the former home of the Starland Dairy, today the site incorporates several mixed use buildings and others that have been adaptively reused, including a historic Victorian house turned rental property with storefront below (bottom left), a new LEED Gold loft complex (bottom right background) that incorporates commercial uses along the first floor as well as an interior bamboo garden, and refrigerated dairy lockers turned retail (bottom right foreground).

Since its construction, the project has been the catalyst for what has become the city’s most up-and-coming neighborhood, referred to by Savannahians as “Starland.” The area is home to the city’s growing artist community with studio and retail spaces at street level and residential loft units above. Once a month the street seen below is closed for “Art March” where not only the art, but the buildings, are on display.

**AWARDS**
- 2007 AIA GEORGIA (STARLAND LOFTS)
- 2006 AIA SOUTH ATLANTIC REGION (STARLAND LOFTS)
- 2007 AIA SAVANNAH (STARLAND LOFTS)
- 2006 (STARLAND LOFTS) & 2002 (STARLAND DESIGN CENTER)
- HISTORIC SAVANNAH FOUNDATION
- 2007 LEED GOLD CERTIFICATION (STARLAND LOFTS)
- 2007 FINALIST, EXCELLENCE IN DESIGN AWARDS, ENVIRONMENTAL + CONSTRUCTION MAGAZINE (STARLAND LOFTS)
The Starland Lofts building (right and first image below) has received particular recognition as a leader in green design. With access to nearby bus routes and on-site bicycle storage, alternative forms of transportation are accessible and convenient. Landscaping of the site’s interior courtyard utilizes drought-tolerant plants, reducing water consumption from irrigation.

The exterior walls, floor, and roof assemblies are constructed using an innovative form of precast concrete panels. These panels are cast with a layer of rigid insulation sandwiched between two layers of high-density concrete and high-efficiency windows, providing a high level of insulation for the entire building.

On the roof, a reflective single-ply roofing system covers the panels and reduces the heat-island effect. The interior and exterior use of concrete as a finish surface eliminates the need for additional finish materials, reducing materials and costs for the entire project.

SUSTAINABILITY AT ITS BEST

“The jury felt that the project [Starland Lofts] was appropriately scaled, sensitively sited and a wonderful interplay of materials, solids, and voids. This proves that a modest budget can achieve LEED Gold results. The result is a wonderful re-anchoring and reanimation of an abandoned city block.”

2008 AIA AWARD
THE GEORGIA ARCHITECT

DECLARATION OF RESPONSIBILITY

I have personal knowledge of the nominee’s responsibility for the project listed above. That responsibility included:

Largely responsible for design, Project direction under nominee, and Nominee’s firm executed the project

mentorship

role of nominee | mentor

 synopsis | Jerry has been a mentor for multiple generations of students throughout his career.

the majority of Jerry's mentorship has occurred at the Savannah College of Art and Design (SCAD) School of Building Arts and within the office through the nurturing of interns. 

the result has been a mutually beneficial relationship.

“Over the past 16 years, Jerry has been my mentor and has not only taught me about making sensitive, responsive and well-designed architecture, but he has taught me that architecture is “a life” and we owe it to the profession to be well-rounded stewards of our communities.”

KEVIN F. ROSE, AIA
BERNARD B. ROTHSCILD AWARD NOMINATION
SEPTEMBER 10, 2007

MODEL PRACTICE FOR STUDENTS

Jerry continually invites students to visit the office of Lominack Kolman Smith and always makes himself available when they have questions or are interested in learning more about the firm or practicing architecture. In 2009, Jerry was interviewed by a student from Virginia Polytechnic Institute and State University, who published his interview and case study of Lominack Kolman Smith (above) with the help of the Association of Collegiate Schools of Architecture, highlighting the design of the LKS office as part of his study of professional architectural practice.

The University's project won the 2011 NCARB Grand Prize.

OFFICE LEADERSHIP

“Mr. Lominack is a mentor, an inspiration and a ‘father of architecture.’ He has taught us about design excellence, professional conduct and professional practice...Our continued education is of utmost concern to him as he makes a vital effort to include us, and encourage us, in all aspects of the professional world to which we belong...He encourages us to express our opinions, to defend our ideas.”

CYNTHIA J. HUNTER, AIA; JENNIFER H. DEACON, AIA; CASSIE R. BECKWITH; KEVIN F. ROSE, AIA
BERNARD B. ROTHSCILD AWARD NOMINATION
COMMITMENT TO EDUCATION

“...the area with which I am most familiar is Jerry’s extraordinary commitment to nurture and mentoring the next generation of architects. In addition to serving as an invaluable and dedicated member of the SCAD School of Building Arts Advisory Board, Mr. Lominack works closely with students as a thesis advisor and frequently serves on project critique juries. Jerry also regularly provides opportunities for students to visit the offices of Lominack Kolman Smith and utilizes those occasions to initiate design dialogue and discussion of pertinent professional issues. He has also been extremely generous in providing on-site project tours that offer students a venue that clearly illustrates the responsibilities of the architect during construction and contract administration phases...Jerry Lominack has demonstrated a remarkable dedication and commitment to SCAD architecture students and to the College, the School of Buildings arts, the department, and the faculty. His professionalism, enthusiasm, curiosity, humor, and zest for life have been, and continue to be, an enormous gift to architectural education.”

### Robert T. Spencer House

**Project**: Private residence, historic rehabilitation  

**Firm of Record**: Lominack Kolman Smith Architects  

**Date Completed**: 2009  

**Role of Nominee**: Principal architect  

**Location**: Savannah Victorian Historic District  

**Synopsis**: Built in 1881, 214 East Park Avenue was the home of Robert T. and Ellen E. Spencer, a successful African-American businessman, great-grandfather of retired Savannah State University professor Dr. Lester B. Johnson, Jr., and great-great-grandfather of Savannah attorney Lester B. Johnson, III.

This transformative and catalytic preservation project included the complete restoration and rehabilitation of the original historic Robert T. Spencer House and the design and construction of a modern rear two-story kitchen and master bedroom addition as well as a new attached carriage house. Jerry designed the renovation and a modern addition as well as managed the project.
robert t. spencer house

This 1,900 square foot Carpenter Italianate style single-family home was converted into two apartments in 1934. During the mid 1950s, the front wooden porch, the wooden columns, gingerbread elements, and the balusters were replaced with concrete and wrought iron. In 2001, the house suffered a devastating fire. The house was purchased by Historic Savannah Foundation (HSF) with its Revolving Fund in 2007. HSF stabilized and secured the building, and in early 2008, Dr. Richard and Theresa Feldstein purchased the property and hired Jerry to perform the house’s rehabilitation.

Located in Savannah’s Victorian Historic District, the project adhered to the city’s design guidelines for historic districts. The house was converted back to a single family residence and a wall that was built to separate the foyer was removed and the stair restored (above). A rear addition from 1934 was in very poor condition and was removed. The construction of a new rear addition presented a unique challenge. Even though the property is situated on a double lot, adding over 2,000 square feet to a downtown Savannah property without crowding it can be difficult. The result was a modern, yet compatible, design that is efficient and attractive, allowing for an ample garden and courtyard (left).

ATTENTION TO DETAIL

The front porch was restored to its original gingerbread grandeur, as were the fireplaces, crown molding, wood double-hung windows, eave corbels, and many other important interior and exterior details. The interior of the house suffered greatly from the 2001 fire as all of the interior plaster was lost, but the majority of the studs were salvageable. Original hardwood flooring, wainscoting, and some decorative trim also remained and were restored.

The building is now harmonious with other buildings in the area, its rehabilitation allowing the home to rejoin the Savannah community as a viable contributor to the neighborhood’s historic integrity.

DECLARATION OF RESPONSIBILITY

I have personal knowledge of the nominee’s responsibility for the project listed above. That responsibility included:

Largely responsible for design, Project direction under nominee, and Nominee’s firm executed the project

Dr. Richard Feldstein, Property Owner
The project at Trustees’ Garden is a multi-parcel, multi-use project that has the potential to transform the northeast corner of Savannah’s Historic Landmark District into a performing arts hub. An elevated site overlooking the Savannah River, this section of the city once housed the garden for which Georgia was founded, dating the land to the 1700s. This story however, has largely been unrecognized, as have the buildings representing the subsequent uses of Trustees’ Garden, many of which have deteriorated in recent decades. Jerry initially became involved in the area after Charles Morris acquired several properties, developing café sketches for existing building’s in the neighborhood’s northern section. Since, Jerry’s historic preservation expertise has been enlisted for the rehabilitation of the Kehoe Iron Works, an old industrial complex that anchors the site. Currently, the historic metal Machine Shop associated with the Iron Works is undergoing renovation for use as a full-service event space. Suffering from neglect, the building had become significantly deteriorated. Jerry insisted this building be addressed at the outset to save it from collapse. Following, the masonry Foundry buildings to the west will undergo renovation to include the restoration of a long since removed cupola (first image below). The Foundry will house a black box theater, a box office, television performance kitchen, and offices. Lastly, the sloped lawn at the northeast corner of the property will be transformed into an outdoor amphitheater for live events.
“As a long-time Savannah resident, I find this restoration effort to be perhaps the most exciting to come along in years...I feel certain that Savannah will wholeheartedly support [Charles Morris’] efforts, and may I offer the first ‘BRAVO!’”

BARBARA HOFER, LETTER TO THE EDITOR
SAVANNAH MORNING NEWS, JULY 19, 2014

An important site in Savannah’s history, Trustees’ Garden is situated at the eastern end of the city’s historic downtown. Dating to the founding of the colony, Trustees’ Garden was the site of an experimental garden to grow items to relieve England of its dependency on Spain and other countries; growing grapes for wine and mulberry trees for silkworms. While these failed, cotton and peaches thrived becoming important Georgia crops. Since, the site has been developed for residential and commercial uses, including serving as a hub for the Atlanta Gas Light Company for many years.

Trustees’ Garden is the last large parcel of property unrestored in Savannah’s National Historic Landmark District.

KEHOE IRON MACHINE SHOP

- Significant iron restoration
- 8,000 square feet of event space
- Restoration of historic railroad tracks through building as an interior feature
- State-of-the-art acoustics and lighting
- Full kitchen and catering facilities
- 2,000 square foot annex of multi-use space
- Outdoor plaza and amphitheater

IRON REHABILITATION

When the Kehoe Iron Works Machine Shop was first examined, it was clear that the building would not stand much longer if its issues were not addressed. Latticed columns, beams, and trusses, all suffering from rust, were significantly deteriorated. Many elements were completely severed, such as columns detached from their footings, dangling from the trusses above.

As part of the building’s rehabilitation, all ironwork was repaired whenever possible. Crafting replacement elements when necessary, new steel columns were spliced into halves of existing columns, a challenging task.

Further, the building’s corrugated metal exterior was significantly weathered and failing. This sheathing was removed in its entirety and is currently being stored for later reuse as artwork that will be placed in specific locations along the building’s modern corrugated metal exterior.
SECTION 3: EXHIBITS

trustees’ garden

KEHOE IRON FOUNDRY

The masonry buildings associated with the Kehoe Iron Works have been some of the most forgotten and iconic buildings of Savannah’s industrial past.

The rehabilitation of these buildings will anchor the site as well as the northeastern corner of Savannah’s downtown, bringing attention to why Savannah was founded in the Trustees’ Garden story while highlighting the city’s modern emphasis on art through the buildings’ use a multi-purpose performing arts venue.

- Cupola restoration
- Black box theatre
- Reception and office space
- Live performance space
- Box office
- Restaurant
- Rear glass circulation tower with views of Savannah River

STRONG VISION

“Charles’ vision for Trustees Garden has been to develop a democratic park-like space where communities can come together and express their identities,” [Rob] Gibson said. “So, the inclusion of a well-designed amphitheater would be a great marriage of an historically important urban site with the performing arts, thus creating another place for cultural vitality within our city.”

risen from the rubble

project | new construction, adaptive reuse
firm of record | Lominack Kolman Smith Architects
role of nominee | principal architect
synopsis | Jerry has a talent for seeing potential and opportunity in deteriorated areas and forgotten buildings. He has worked in unique and challenging environments, hiring teams to complete projects that required intensive coordination between consultants, unusual site work, and unique solutions. These projects emphasize space that has a strong sense of place.

These transformations are best described as solutions that have risen from the rubble.

PORTER MEMORIAL GYMNASIUM: COMMUNITY RESURGENCE

“History was made and remembered Saturday as old friends, neighbors and classmates gathered in an old building with no roof that glowed with the past…there’s not a facility anywhere around like the Porterdale Memorial Gym.”
